Avenue, Bournemouth

**Cost:** £75— Boost funding  
available for BCP Schools

Please book via:

[www.bcpworkforcedevelopment.co.uk](http://www.bcpworkforcedevelopment.co.uk)

This course is aimed at both teachers and teaching assistants. It explores why different specific learning difficulties make it harder for some children to learn about numbers and reviews the current research and understanding of dyscalculia. The course offers practical advice for staff working with children who are experiencing difficulty with maths. This includes strategies for whole class teaching as well as for individual or group intervention

Delegates will develop their understanding of dyscalculia and learn about the impact of specific learning difficulties on the development of numeracy skills. Practical strategies that are used to support children with numeracy difficulties will be shared.
