

Supporting SEN students with Maths

Suitable for SENCO, Teachers, HLTA's, Teaching Assistants

Led by Jane Cottee

Dorset Council Education and Early Help

Jane has extensive experience of teaching maths to Key Stage 2 children with SEN in mainstream settings; she has over 20 years of experience of mainstream maths teaching, both mixed-ability and teaching lower-ability maths sets. Since joining Dorset Council as an SEN Advisory Teacher, she has also taken on the maths training for accredited courses and developed the dyscalculia courses and assessments.

Please book via:

www.bcpworkforcedevelopment.co.uk

Date: 24th February 2021

Time: 1pm – 4pm

Virtual Delivery by Zoom

Cost: £50— **Boost funding available for BCP Schools**

This session will explore why those with a wide range of SEN experience difficulties in maths. ASD, AHD, Dyslexia, Speech and Language Difficulties and Dyspraxia can all cause problems in maths. Improved awareness of these difficulties will support teachers to make small modifications that will lead to improved outcomes and better progress.

The session is suitable for SENCOs, teachers and teaching assistants. This course will provide delegates with strategies to use in class immediately that will support their vulnerable learners. The focus of this session will be on supporting SEN children in whole-class teaching.
