

Primary School Talk

Speech and Language

Led by

Dorset Healthcare Paediatric SaLT Service

This training is based on ICAN's School Talk Training Pack. The aim of the training is to provide primary practitioners with a wider knowledge and understanding of a range of speech, language and communication needs that they are likely to experience day-to-day. We will cover how to identify children with these needs, alongside providing a wide range of strategies to support children with SLCN in the classroom, at an individual, class and whole school level.

4th May 2021

09:30 AM- 3:30PM
